

## Our Bioflow products

Make up your own mind – more than a million customers have already made the decision to use our magnotherapy products – now is the time to join them.

Magnotherapy is not a new concept, in fact the beneficial properties of magnets on health have been known for thousands of years.

Ecoflow have been at the leading edge of developing this science into practical products for over a decade and the benefits of our Bioflow® range of magnotherapy products are not limited to humans. We have also developed an extensive range of products for animals - from cats to horses! (See pages 41-42).

The patented Bioflow® range is registered as a Class 1 medical device and uses our Central Reverse Polarity (CRP)® technology to maximise the beneficial effects of magnetism on the body.

In December 2004, the British Medical Journal published a report documenting that in an independent, scientifically reviewed clinical trial, Bioflow® magnetic bracelets do reduce pain in osteoarthritis.

Central Reverse Polarity (CRP)® technology can also be found in products developed by Ecoflow for the Home and Car. (See pages 44-45).

### IMPORTANT NOTES

Bioflow® products should not be worn by anyone fitted with a heart pacemaker or other implant that could be affected by a strong magnetic field. There is no substitute for sound medical advice and we recommend that if you are, or have been receiving any treatment for a particular condition and have any doubts about the use of Bioflow®, you should consult your doctor.

UNIQUE  
PRODUCT

## Explorer 2

The Explorer 2 has a concealed CRP® module and relay magnet incorporated into its durable strap. Great for everyday use, the Explorer 2 is available in mens and ladies sizes, in a choice of black or royal blue. The ladies design has a narrower module and strap.
